glassmarket

Advertise in GLAS

*Wiew
your
products
through
GLAS*

The magazine GLAS is the only Swedish magazine to keep in close contact with the glass trade. This way we can guarantee always to be well informed about the latest in products, constructions, trade and profiles. The magazine will be giving an even deeper understanding of everything concerning the glass trade. The magazine is distributed to most of Sweden's architects, property owners, administrators, leaders of projects, consultants and of course all glaziers, framemakers and constructors of glass. This way, you as contributor of products or services in the trade, will certainly reach the right target group with your message. This makes GLAS an effective media choice.

The number of ad. pages is limited in every edition. Thus the editorial office finds a good balance between text pages and ad. pages, which gives your ad a higher reading value. When you advertise in GLAS you know that the readers are: architects, property owners, administrators, leaders of projects, consultants and business firms within the trade. The magazine GLAS speaks for the glass trade.

Apart from products, persons and projects the magazine also gives an account for what the trades organisation and authorities do to influence the development. It is a trade at the beginning of the new millennium that will increase its business volume by several milliards each year. The magazine regularly reaches prescribers and buyers of goods and services of the glass trade. It also reaches more than 600 companies belonging to the glass trade society such as glaziers, framemakers as well as glass- and metal industries.
